18. Cracow (13)	36. Algeria (—)	

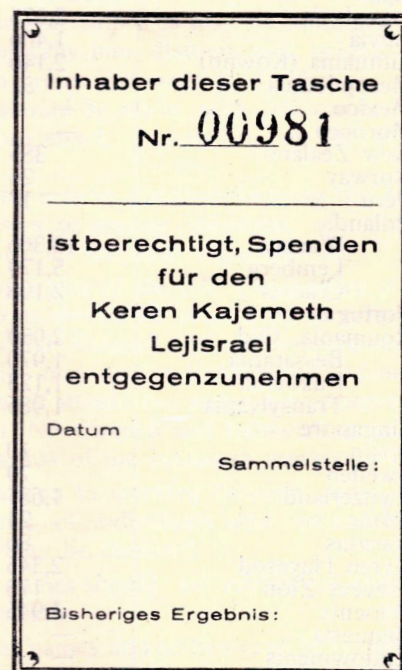

The Collecting Bag.

A valued colleague in Karlsbad, a member of the Central Commission of the Keren

Erzeuger: Dr. Köhner, Karlsbad

Kayemeth of Czechoslovakia, has invented a collecting paper bag which is being used in that country as a new collecting means. He has patented his invention thus protecting it legally from imitation by other institutions. The bag is small, easily slipping into a vest pocket or in a lady's handbag. It is useful wherever the National Fund Box is not to hand, as in the train, café, theatre, or on the road. During the short period in which the new means has been used in Czechoslovakia it has become extremely popular. The Commission has found

Muster gesetzlich geschützt Nr.4674

that it brings new friends who otherwise would not be attracted to participate in collecting work. The new feature has been tried in a number of countries and approved of, and we suggest that it be experimented with in all countries.
